Building a Nation of Lifesavers

Employee and Community Engagement • 2021-2022

The Heart and Stroke Foundation of India (HSFI) is committed to building a nation of lifesavers.

Join us! Register your business or community group to participate in our program designed to inform and train communities with lifesaving information to improve the health, safety, and longevity of India.

HSFI is a subsidiary of the American Heart Association, a global leader in offering technical support, science exchange, and training to governments, healthcare providers, hospital and pre-hospital systems, workplaces, and communities.

Our programs align with both the American Heart Association's and India's health priorities. We serve as a link for local, national, and global partnerships aimed at improving the health and life expectancy of children and adults in India.
